

## **Cool Spring-Adelphi Elementary School Project Update Meeting | March 18, 2025 Questions & Answers**

**Central Admin offices should include the Bilingual Assessment team which is a part of Special Education.**

Central Admin will be in the Phase 2 Annex Building. The new school building at the front of the site will only be inhabited by the elementary school program and the Judy Center.

**Will the current parking lot be affected in phase 1?**

Yes. Geothermal will be located under the existing parking lot, ensuring adequate parking throughout construction. That was one of the things considered for the construction manager process. Once brought on, the construction manager will address on-site parking and the options for dealing with that.

**Does that central office building involve the Office of Psychological Services?**

Psychology will be moved to a different location and will not be a part of the Annex.

**I would like to know where the children will go to school when construction begins and if they will have a bus.**

During construction, the kids will remain at Cool Spring Elementary or Adelphi Elementary. Buses will be on-site, and they're being considered as part of the phasing.

**Does this mean Cool Springs and Adelphi will merge to make one elementary school?**

Yes. We are not sure at the time if it will be a permanent transition, but we will confirm as the project moves forward.

**What will happen to Adelphi School employees after the school closes? Will they be absorbed into the new school? Will they be given priority in interviews to join the new school?**

The Cool Spring and Adelphi campuses will merge into one school. Human resources has provided guidance on the protocols to be followed once the two buildings merge.

**Will the Cool Spring staff be automatically transitioned into the new school once it's completed?**

We will follow through and work with human resources to ensure that clear guidelines are provided to all impacted staff members. There will be more to come on that. As soon as we have that information ready for you, you will be the first one to receive it so we can make sure you are accommodated.

**When will the actual building of Adelphi Elementary School close for good?**

The building is expected to be closed in Summer 2027 after the completion of the Phase 1 school building and the transition of Adelphi Elementary into Cool Spring.

**Will there be any special education program such as a regional, CRI, or other type of program at the new school?**

All of that information will be finalized once we have the directive from our Superintendent and the Chief of Academics. Please stand by for that information!

**Will the existing Annex building be used for Phase 1 while the actual school is built?**

The existing Annex and several temporary trailer classrooms will be removed for Phase 1.

**Will the International Office be moved due to these changes, or will it remain in its current location and have its own space in the new construction?**

Yes, they will remain in their current location during Phase 1 construction. During Phase 2, they will relocate to the existing elementary school building. When Phase 2 is completed, they will be permanently located in the Phase 2 Annex Building.
